City of St. George Energy Services Department Chooses Milsoft Engineering Analysis

ABILENE, Texas – February 18, 2013 — Milsoft Utility Solutions, Inc., The St. George Energy Services Department (SGESD) in Utah has chosen Milsoft Engineering Analysis.

SGESD continuously improves its capabilities for planning, operations and management of its electric utility system. “We will be using the Milsoft Engineering Analysis software to more accurately model and analyze our system, which will help us plan and operate more efficiently” said Engineer Dustin Pike, “and this will help us to plan, analyze and operate as reliably, efficiently and economically as possible.”

Milsoft Engineering Analysis software is used by 1,000 electric utilities, consulting firms, universities and others for electric utility system planning, analysis and operations. The extremely sophisticated, but easy-to-use software has been helping utilities for more than 25 years to increase employee productivity, service reliability and operational efficiency, as well as ensure the most economical system improvements and additions. The software is unparalleled in detail, accuracy and versatility, and Milsoft’s excellence in customer support is legendary.

About City of St George City Energy Services Department

Founded in 1909, SGESD provides power and energy to more than 28,000 residential and commercial customers in Washington County in the southwest corner of Utah. According to the US Census, the city of St. George was the second fastest growing metropolitan area in the US during the first decade of the 21st century. SGESD is one of 94 of the nation’s more than 2,000 public power utilities to earn Reliable Public Power Provider (RP3) recognition from the American Public Power Association for providing consumers with the highest degree of reliable and safe electric service.
