Quick deployment and quick payback

Designed specifically for utilities, Clevest Automatic Vehicle Location (AVL) instantly gives dispatchers and supervisors the real-time location of vehicles for optimal fleet health and field operations. You'll quickly improve productivity and safety while lowering operating costs by directing and managing your fleet.

Get started with AVL Express Lane

With AVL Express Lane there's no up-front capital costs as the hardware and hosting are included in a convenient monthly fee. And there's no waiting for the next budget cycle as the solution typically pays for itself with the average fuel and productivity savings generated in the first quarter of use.

Office users will quickly and easily:

- Track key vehicle information
- Track vehicles on outage maps
- Determine the closest vehicle to a job
- Generate reports
- Visualize fleet status to address issues
- Monitor colour-coded alerts based on priority

Learn why over 100 utilities have chosen Clevest AVL for their fleet operations.
Contact info@clevest.com or 866-915-0088 to get started today.

Clevest provides software for mobile workforce management and smart grid operations exclusively for electric, gas and water utilities. We are specialists at enabling utilities to transform their field operations by rapidly automating and optimizing any field work activity or process to improve response time and effectiveness.
