

## Do You Know Who's Watching Your Network?

Cybersecurity has become one of the highest priorities for utilities due to the increasing number and variety of cyber threats. A layered approach to cybersecurity and continuous monitoring are two of the essential elements to a building comprehensive strategy. [N-Dimension](#) is Hometown Connection's exclusive cybersecurity partner and offers a comprehensive cybersecurity monitoring solution tailored for utilities.

N-Dimension is a managed security service provider (MSSP). [N-Sentinel](#) by N-Dimension provides utilities with 24 x 7 monitoring of IT and OT networks for cyber threats. In addition to real-time alerts, it delivers the information you need to improve your security posture by identifying potential cyber vulnerabilities. Unlike other products where you get extensive logs to analyze on your own, N-Sentinel provides the analysis along with detailed information about threats, and expert guidance on actions you can take to reduce those threats. N-Sentinel frees IT time for other activities. With N-Sentinel you also get access to cybersecurity experts who can answer questions and help you improve your security posture. Plus it provides utility community cyber threat data, delivering insights about the threats being launched against other utilities and enabling you to take preventative actions.

### Free Cybersecurity Webinar and Free Trial

Don't wait to get hacked, find out what threats are on your network today! Join a free [webinar](#) to learn more about the importance of utility cybersecurity monitoring. [Sign up](#) for a free trial of N-Sentinel to find out what may be threatening your network.
