ENGINEERING & OPERATIONS

Bringing the Benefits of New Technologies to Public Power

The integrated products and services offered through Hometown Connections in support of utility Engineering & Operations include AMI, OMS, GIS systems, distributed generation, mobile workforce solutions, engineering analysis software, operations management software, and cyber & physical security.

BUSINESS & FINANCE

The Right Systems, Strategies and People for Today's Marketplace

Hometown Connections joins with public power's leading consultants and software providers to deliver CIS/billing, financials, workforce solutions, energy trading/risk management, property insurance, cyber liability insurance, meter & operational data management, and business planning & financial policy guidance.

CUSTOMER CONNECTIONS

Empowering the Community with New Information and Tools

The companies partnered with Hometown Connections enable a public power utility to deliver online outbound personalized communications to customers, collect and deploy data to respond quickly to outages or inquiries, keep customers informed of system events, offer customers backup and peak shaving generation, help customers reduce costs through digital engagement tools, and let customer research drive utility program design.

SYSTEM IMPROVEMENT

Applying Public Power's Best Practices to Each Utility

Based on experience addressing utility operations with more than 900 public power utilities, the staff of Hometown Connections and its partners provide consulting and facilitation needed to maintain a high level of service quality and system performance. Essential support services include risk management, organization assessments, customer & employee research, strategic planning, technology planning, governance training, and workforce solutions.
