## **Loudon Utilities Board Chooses Milsoft Engineering Analysis**

**ABILENE, Texas – June 20, 2014 — *Milsoft Utility Solutions, Inc.***, The City of Loudon, Tennessee, Utilities Board (LUB) has chosen Milsoft Engineering Analysis (EA).

Loudon Utilities Board, a user of Milsoft Geographic Information System, has chosen Milsoft Engineering Analysis to create, maintain and utilize an accurate, detailed model of its electric distribution system for planning and operations. LUB will use the mapping and engineering software to help plan, analyze, operate and manage its electric distribution system as efficiently and effectively as possible.

Milsoft EA is used by more than 1,000 electric utilities, consultants, universities, research labs and others to model electric distribution networks for planning, analysis and operations. The extremely sophisticated but easy-to-use software has been helping utilities for more than 25 years to increase employee productivity, service reliability and operational efficiency as well as to ensure the most economical system improvements and additions. The software is unparalleled in detail, accuracy and versatility.

### **About Loudon Utilities Board**

Loudon Utilities Board (LUB) was founded in 1939 as a public power distributor on the Tennessee Valley Authority (TVA) electric power grid. LUB provides electric, gas, water and sewer service to over 10,000 customers in eastern Tennessee. The LUB electric service area includes portions of Loudon and Monroe Counties, including the cities of Loudon, Philadelphia and Vonore. Learn more at: [Loudon Utilities Board](#).

### **Milsoft Utility Solutions, Inc.**

The Milsoft team has provided industry leading engineering and operations software and support to electric utilities in the US and abroad for more than 25 years. More than a thousand utilities, consultants, universities and others use Milsoft solutions. Milsoft's E&O System integrates Milsoft's Engineering Analysis, Outage Management, Geographic Information, Field Engineering and IVR Communications with each other and with a utility's other applications and data to enable the most efficient and effective planning, operation and management of an intelligent grid. Milsoft's customers say that the company's excellence in technical support and customer service is unmatched by other vendors that they deal with. Learn more at: [Milsoft Utility Solutions](#).
