

## Weatherford Electric Utility Chooses Milsoft Engineering Analysis, GIS & Field Engineering

**ABILENE, Texas – October 29, 2013 — Milsoft Utility Solutions, Inc.,** The City of Weatherford, Texas, Municipal Utility System (WMUS) has purchased Milsoft Engineering Analysis (EA), Milsoft Geographic Information System (GIS) and Milsoft Field Engineering (FE).

Weatherford Municipal Utility System's commitment to productivity and efficiency has led it to aggressively "sharpen its axe" for operations and management. As WMUS continues to grow and the electric energy industry changes rapidly, the utility's staff believes that better tools are needed, and that this suite of Milsoft solutions will provide those tools needed to model and analyze the electric distribution system for the best possible planning, operations and management.

Milsoft EA is used by more than 1,000 electric utilities, consultants, universities, research labs and others to model electric distribution networks for planning, analysis and operations. The extremely sophisticated but easy-to-use software has been helping utilities for more than 25 years to increase employee productivity, service reliability and operational efficiency as well as to ensure the most economical system improvements and additions. The software is unparalleled in detail, accuracy and versatility.

Milsoft GIS software provides state of the art capabilities for electric utility mapping and asset data management through powerful yet easy to use software that incorporates a detailed electric network circuit model and is fully integrated with ESRI GIS tools. Milsoft Field Engineering enables rapid, efficient collection and utilization of data during field design of system additions and improvements. GIS and FE together provide the data capture, management and display capabilities that a utility needs to realize the full benefits of using GIS.

### **About Weatherford Municipal Utility System**

Organized in 1937, the Weatherford Municipal Utility System began supplying power and energy to city residents in 1940. Today the growing electric utility serves more than 13,400 residential, commercial and industrial customers in a 52 square mile service area in and around the City. The goal of the utility is to provide safe, reliable, competitive energy services for the benefit of its customers as well as the City and its citizens.
