Winfield Municipal Electric Utility Selects Milsoft Engineering Analysis and GIS

ABILENE, Texas – April 30, 2013 — Milsoft Utility Solutions, Inc., The City of Winfield, Kansas, Municipal Electric Utility has chosen Milsoft Engineering Analysis (EA) and Milsoft Geographic Information System (GIS).

The Winfield, Kansas, municipal electric utility is implementing the best available technology to be able to best serve its customers and their community. The utility recently selected Milsoft Engineering Analysis (EA) and Milsoft Geographic Information System (GIS) in order to better plan, analyze, operate and manage it's electric system. "I used a student version of Milsoft EA while at Wichita State University," said James Ging, Director of Electric and Water, "and the City already uses ESRI GIS products, so these should be a great fit for us."

Milsoft EA is used by nearly 1,000 electric utilities, consultants, universities, research labs and others to model electric distribution networks for planning, analysis and operations. The extremely sophisticated but easy-to-use software has been helping utilities for more than 25 years to increase employee productivity, service reliability and operational efficiency as well as to ensure the most economical system improvements and additions. The software is unparalleled in detail, accuracy and versatility.

Milsoft GIS software is used by some 150 electric utilities and consulting firms for electric utility mapping and asset data management. The powerful yet easy to use software incorporates a detailed electric network circuit model and is fully integrated with ESRI GIS tools. Milsoft GIS provides the data capture, management and display capabilities that a utility needs to maximize the benefits of using GIS.

About Winfield Municipal Electric Utility

The Winfield, Kansas, municipal electric utility was established in 1904. The utility provides electric service to some 8,100 residents and businesses in Winfield, Burden, Dexter, Strother Field Industrial Park and much of the rural area of northern Cowley County. Winfield is one of the more than 2,000 community-owned electric utilities in the US that represent a 130 year old American tradition that continues to work by improving lives and business through affordable and reliable electricity with an unalloyed focus on the well being of the community.
